FOREWORD
Plant irises in sunny, well drained locations. The rhizome, the botanical term for the creeping rootstock from which the true roots grow, should be placed just below the surface of the soil, making a hole sufficiently large to spread out the roots. Pack the soil around them, water and do not let them dry out until new growth has started. Point the growing points in the same direction when planting three or more rhizomes of the same variety. If, as so often done, they are pointed in opposite direction the result will be a clump with an open center which will not produce a solid mass of bloom. July and August are the best planting months, but they can be planted at any time the soil can be worked.

JOIN THE AMERICAN IRIS SOCIETY, membership in which will bring you four meaty Bulletins per year. These bulletins are really books of a hundred pages or more filled to the brim with articles on iris culture, garden planting, awards, varietal comments, questions and answers and news of iris activities everywhere. Dues are $\$ 4.00$ per year. Send your remittance to us and we will enter membership for you.

## 1955 INTRODUCTIONS

## IRIS

BLACK BABY (H. E: Sass, 1955)-A dark red purple blend chaemiris-12 in. . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 3.00$

TANGO (48-411) A medium toned blue with flaring falls. Good substance. Branching stem $36^{\prime \prime}$ tall ........ $\$ 5.00$

## HEMEROCALLIS FROM NEBRASKA

The outstanding characteristics of the hemerocallis is its extreme hardiness and sturdy habit of growth. No insect nor disease has been known to destroy it and any location suits it. It is hardy anywhere when established.

Hemerocallis will be shipped in late August and September, after they have finished blooming and seed is harvested. They should be planted at the same depth as in the nursery; the bleached part of the plant will tell you how deep in the ground it was.

Join the Hemerocallis Society and receive the Annual Yearbook and periodic News Letters. Dues are $\$ 3.50$ per year Send remittance to us and we will enter membership for you.

APRICOT QUEEN (45-54) (H. E. Sass, 1948)-Apricot colored self. 40 flowers on a 40 -inch stem. August . . . . . $\$ 2.00$
